

TurtleVerse (TVERSE)

Whitepaper — Project Information

Version: 1.0
Network: Solana
Launch: pump.fun (standard Solana token setup)
Date: 06 Mar 2026

This document contains project-only information for TurtleVerse (TVERSE). It avoids hype claims and focuses on token facts, policies, and verification steps.

Official Channels

Website: turtleverse.netlify.app
X (Twitter): x.com/VerseTurtl37302
Discord: discord.gg/GkPH3p2JNR

1. Overview

TurtleVerse (TVERSE) is a sea-turtle themed community token on Solana, launched via pump.fun using a standard Solana token setup. The project is built around a strong ocean-themed brand identity, community-led growth, and transparency through official communication channels.

2. Chain & Launch

Network: Solana

Launch Method: pump.fun (standard Solana token setup)

Ticker: TVERSE

Because the launch is standard, TurtleVerse emphasizes on-chain verification rather than claiming audits for custom contract code.

3. Official Communication Channels

Website: turtleverse.netlify.app

X (Twitter): x.com/VerseTurtl37302

Discord: discord.gg/GkPH3p2JNR

All official updates and the mint address will be shared only through the channels above.

4. Token Information

Token Name: TurtleVerse

Symbol: TVERSE

Total Supply: 1,000,000,000 (1B)

Decimals: 9 (standard Solana-style)

5. Tokenomics

TurtleVerse uses a simple and transparent allocation approach with clear caps.

Category	Policy / Cap	Notes
Dev Holding	May scale up to 2% (gradual)	Up to 20,000,000 TVERSE

Treasury/Marketing	May scale up to 4% (gradual)	Up to 40,000,000 TVERSE
Remaining Supply	Community / liquidity / ecosystem	Remainder of supply

Allocation Policy

Instead of setting the maximum allocation from day one, the project may scale holdings gradually up to the caps. Any changes will be announced publicly in advance via official channels before execution.

6. Verification & Safety

At launch, TurtleVerse will publish the official mint address and verification links.

Launch-day safety rules

- Mint address will be posted first on: Website → Discord announcements → X pinned post
- Ignore random DMs and comment-section contracts
- Verify the mint address using official channels only

Verification Links (activate after launch)

Solscan: (to be added)

DexScreener: (to be added)

Birdeye: (to be added)

7. Burn Mechanism

A burn mechanism may be introduced later as a community-led feature. If enabled, burn events will be announced publicly and burn amounts will be trackable and shared transparently.

8. Roadmap

Phase 1 — Launch & Foundation: Finalize branding assets, community channels live (X/Discord), token launch on pump.fun, mint address + verification links published on official channels.

Phase 2 — Growth & Community: Marketing push & awareness, community events & memes, tracking platform visibility, partnerships & collaborations.

Phase 3 — Expansion: Ecosystem improvements, utility exploration (community-driven), ownership review & long-term governance approach, TurtleVerse brand expansion.

9. Disclaimer

TurtleVerse (TVERSE) is a community token. This document is for informational purposes only and does not constitute financial advice. Participation involves risk. Always verify the official mint address via the official channels listed above.
